Aligners

of 3, 6 and 9 m

Alsina has a range of braces used to stabilize and plumb the wall screens.

Designed without thread in the upper part to avoid concrete accumulation, it has an easy to remove base plate and various possibilities for securing to the ground.

Its design incorporates an anchoring system to the non-detachable panel, which allows the movement of the panels without needing to disassemble the braces.

The braces shall be connected to the panel using a pin with its safety "R"

The braces are fixed to the ground (or to a concrete block) with a removable base plate

Height from the ground

A) 1.90-2.90 m / B) 3.89-5.30 m / C) 5.63-8.00 m

Minimum angle 30°
