

A EUROPROP

Lightweight shoring with quick release.

Alsina

■ Description

The new generation of Class A Props with quick release and integrated safety system. Alsina, true to its commitment to research, developed a prop, the A, which brings new and significant technological improvements to the market. All of this in a prop weighing only 12 Kg. The Alsina Europrop A prop has been designed and manufactured in compliance with European standard EN 1065, certified by the prestigious German institution Sigma Karlsruhe GmbH.

■ Frequent uses

- Solid, reticular and unidirectional slabs.
- Ideal for reusable systems that allow material savings.

■ Compatible

- Usable with all Mecanoconcept and Vistaform systems.

■ Properties

- New quick, comfortable and safe release.
- Tube and body anti-separating system.
- Greater overlap between body and tube.
- Regulator with stopper for the thread.
- Safety distance against getting hands caught.
- High resistance: made of high-quality steel with greater thickness.
- High durability: less wear and tear.

Prop	Height (m) maximum / minimum	Weight (Kg)	Load (kN)
A30	3.0 / 1.8	12.50	18.0 / 22.5
A35	3.5 / 2.2	15.50	18.38 / 25.0
A40	4.0 / 2.7	17.20	14.95 / 22.89

■ Components and accessories

- Tripod.
- Adaptor for inclined work with Mecanoconcept.
