

ALISAN PROP

Lightweight prop ideal for lightweight slabs.

Alsina

■ Description

Alsina has a range of telescopic props with measurements between 1.5 and 6 metres that can be used with all formwork systems, whether from Alsina or other manufacturers.

■ Components and accessories

- Tripod.

■ Compatible

- Usable with Alumecano, Alucubetas, Alujácena and any light framework solution.

■ Frequent uses

- Bidirectional slabs with or without reusable and unidirectional coffer.

■ Properties

- Manufactured with high-quality steel tube S275JR.
- The bases, the thread and the pin are also made of steel.
- The tube of the prop is painted in polyester paint to protect from outdoor conditions, prolonging use on site.

Prop	Height (m) maximum / minimum	Weight (Kg) No rel. / Rel.	Load (kN)
6m	6.0 / 3.6	31	10.1 / 33.2
5 m	5.20 / 3.55	18.58	9.3 / 23.5
4 m	4.0 / 2.45	11.25	6.0 / 16.4
3 m	3.10 / 1.80	10	11.1 / 19.9
1.5 m	1.50 / 1.0	5.48	9.6 / 11

Alisan Tripod

Support element that helps in the setting up of the floor and can be used with all of Alsina's slab formwork systems. It is very simple to position as it has a closing system with no need to use threaded parts; one hit of a hammer closes and opens the hook ensuring the stability of the props during the setting up of the floor.
