

ALISPLY UNIVERSAL

The column system to withstand 100 kN/m².

Alsina

■ Description

Reusable formwork system for adjustment columns designed to be handled with a crane. Alisply Universal forms the column with an exposed concrete finish, ideal for creating large sections (up to 120 cm). The Universal Panel has the same features as the Alisply Panel

but with one important difference: its cross-beams are reinforced and modified to be able to create columns adjustable on four sides.

■ Components and accessories

- Lifting bracket for use with a crane.
- Walkway Bracket and Work Platform.
- Chamfer with fins for column edge finishing.
- Range of Aligners.

■ Compatible

- Alisply Universal is adaptable both to Alisply Walls and Alisply Circular panels, giving it great versatility and application.

■ Properties

- Frame built with high resistance steel.
- Painted with red polyester paint.
- Weight: 53 kg/m².
- Maximum pressure: 10,000 kg/m².
- Phenolic plywood formwork surface measuring 1.5 cm.
- Exposed concrete finish with phenolic plywood lining.

■ Frequent uses

- Widely used in large section columns, especially for large buildings with shielded columns.
