

CORBEL 500 KN

High-capacity support corbel,
up to 500 kN.

Alsina

■ Description

High-load capacity support corbel for formworking lintels, bridge piers and high slabs, without the need for scaffolding towers. Allows for the system to be unloaded and leveled, enabling assembly and disassembly of the formwork.

■ Compatible

- Horizontal Multiform.

■ Common Uses

- High slabs.
- Bridge piers.
- Lintels.

■ Properties

- Use of the pre-tensioned 38 mm Dywidag rod by means of a manual hydraulic equipment, guaranteeing the correct union between the corbel and the concrete facing.
- With the set made up of the wedge and unloading guide, the formwork and the unloading system can be leveled, thus enabling the assembly and disassembly of the supporting structure.
- The system is completed with a set of HEA-600 beams of various sizes: 3 meters, 12 meters and 15 meters.
- Some of their most frequent uses are high slabs, bridge piers and lintels.
