

WALLITE

Simple manual assembly system.

Alsina

■ Description

Lightweight wall formwork that provides great versatility and adaptability to any shape. The system connects quickly, which gives it high assembly productivity. With only 4 panel widths, a single corner and a few accessories that are easy to install, any shape can be addressed.

■ Components and accessories

- Walkway bracket.
- Aligners.
- Climbing platforms.

■ Frequent uses

- Buildings without cranes.
- Foundations.
- Property separation walls.

■ Properties

- Light and manageable: The panel modules can be transported and assembled by a single person thanks to their low weight.
- Modular: They allow a wide range of construction possibilities and adapt to any shape.
- Simple: Very easy to assemble and disassemble, boosting productivity.
- Strong: The panels can withstand pressures of up to 40 kN/m².
- Economical: The advantages of the panel system translates into significant cost savings compared to other formwork systems.
