

# ALISPLY UNIVERSAL

The column system to withstand 2100 lbf/sq ft.

# Alsina

## ■ Description

Reusable formwork system for adjustment columns designed to be handled with a crane. Alisply Universal forms the column with an exposed concrete finish, ideal for creating large sections (up to 3'-11 1/4"). The Universal Panel has the same features as the Alisply Panel

but with one important difference: its cross-beams are reinforced and modified to be able to create columns adjustable on four sides.

## ■ Components and accessories

- Lifting bracket for use with a crane.
- Walkway Bracket and Work Platform.
- Chamfer with fins for column edge finishing.
- Range of Aligners.

## ■ Compatible

- Alisply Universal is adaptable both to Alisply Walls and Alisply Circular panels, giving it great versatility and application.

## ■ Properties

- Frame built with high resistance steel.
- Painted with red polyester paint.
- Weight: 11 lb/sq ft.
- Maximum pressure: 2000 lb/sq ft.
- Phenolic plywood formwork surface measuring 1/2".
- Exposed concrete finish with phenolic plywood lining.

## ■ Frequent uses

- Widely used in large section columns, especially for large buildings with shielded columns.
