

Tube

Plastic waterproof formwork spacer tubes. These tubes have an outside rough surface to hold onto the concrete, and a inside smooth surface which the tie rod passes through. Easily to cut its lenght with a circular saw or handsaw.

Cone

Plastic cone for PVC spacer tubes. They provide a large contact area to protect the formwork. After formwork removal, the cones are removable. Plastic caps are reusable.

Plug

The plug closes the sleeve, but it does not make it waterproof.

Code	Article	Ø _e (mm)	Ø _i (mm)	e (mm)	Weight (kg/ud)	Quantity per box
44060	D/22-26 PVC Tube	26	22	2000	0,12	100 m
