

AP-2 LEAKPROOF ELEMENT

basics⁺ **Alsina**

Lost cast iron piece that offers total sealing in the through holes of the formwork bars.

It is used with two Dywidag bars tying on both sides and the bars are recoverable leaving only the sealed element as lost.

Sealing element designed for high requirement pressure situations.

Characteristics	
Weight	0,56 kg
Working load	90 kN
Test load	≥195 kN
Waterstop	7 bar
Material	EN-GJMW-400-5
	EN-GJS-500-7
	EN-GJMW-550-4

Code	Article
84036	AP-2 Leakproof element

Measures (mm)	
Ø _e	26
Ø _i	15
L	112
e	5
d	65

Complementary elements for assembly

- Plastic cone.
- Round tube 26/20.
- Plug.
- Dywidag bar.
